

HELUZ clayware ceiling panel

Use

HELUZ ceramic ceiling panels are most commonly used in residential and civic buildings, but their use is also possible in industrial and agricultural buildings up to a room diameter of 7 meters. HELUZ ceramic panels can bear loads immediately after installed on a wall. These ceilings are relatively flexible, can be combined with HELUZ MIAKO ceramic beamed ceilings and used in rugged floor plans. However, they are not appropriate for buildings that are dynamically loaded.

Specifications

Manufacturing plant	Libochovice
Dimensions L x W x H (mm)	4000 x 1000 x 230
Average weight inf.	1493
Reaction to fire class	Class A1 - according to EN 13501-1
Fire resistance (EN 1996-1-2)	REI 90 DP 1 without plaster REI 120 DP 1 with VC plaster 15 mm
