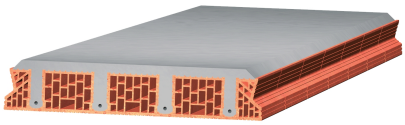
# HELUZ clayware ceiling panel

## Use

HELUZ ceramic ceiling panels are most commonly used in residential and civic buildings, but their use is also possible in  industrial and agricultural buildings up to a room diameter of 7 meters. HELUZ ceramic panels can bear loads immediately after installed on a wall. These ceilings are relatively flexible, can be combined with HELUZ MIAKO ceramic beamed ceilings and used in rugged floor plans. However, they are not appropriate for buildings that are dynamically loaded.



## Specifications

| | |
|---|---|
| Manufacturing plant | Libochovice |
| Dimensions L x W x H (mm) | 4500 x 1000 x 230 |
| Average weight inf. | 1682 |
